

THE MOHAVE MINER.

JAMES J. HYDE, Editor and Manager.

KINGMAN, APRIL 9, 1887.

EDITORIAL NOTES.

Advertise your mining properties.

Blaine is looming up as the almost certain candidate of the republican party next year.

The Flagstaff Champion is improving with each issue under the able management of George H. Tinker.

Treachery is a bad investment, especially for politicians, for all other evils treachery is the most inexorable. —Star.

The Fourteenth Legislative Assembly has been succeeded by a band of Wall-pat Indians who have convened in Prescott to fix up the journals. —Citizen.

It is stated there is not a single member of the 14th legislature who will recognize a single law it passed when they are printed. —Citizen.

The man in a town who refuses to advertise in or subscribe for his home paper, no matter how poor it may be, is unworthy the name of citizen. —Pueblo Star.

The Star very sensibly remarks that we must develop our resources if we would have capital invest in them, and this is just what the miners of Mohave county are doing with all their might and main.

Why does not Zulick try to recover damages for the injury done to his reputation by Republican newspapers in a civil suit, instead of trying to have Republican editors indicted by Grand Juries at the expense of the public.

The latest addition to our exchange list is the MOHAVE COUNTY MINER, a bright and new, well-printed seven-column newspaper, published at Kingman, A. T., and devoted to the best interests of that place and its mining and other industrial resources. —Socorro Bulletin.

If the liquor men should be successful in forming a combination and in winning their fight against the new license law, the several counties of the territory will be compelled to use the expensive currency known as "law bones" for the maintenance of the local government. —Gazette.

Our governor and secretary have proven their economical administration of their private affairs by going before grand juries at the expense of the county to have their personal grievances against editors redressed instead of bringing a civil action at their own expense. —Journal-Miner.

The law passed by the last legislature limited the bounty on lion and bears to \$15 each; on lynx, wild cats and wolves to \$2, and on coyotes to \$1 each, leaving it to the Board of Supervisors to fix a less sum or abolish the payment of bounties entirely. The Board has established the rate for this county, as will be seen by the published proceedings.

The Board of Supervisors expect to issue bonds to the amount of \$10,000 for the purpose of paying the necessary expense of erecting the new Court House. Under an act of the late legislature this amount of bonds can be issued at any time for Court House or Jail purposes. The bonds will bear eight per cent interest and will be exempt from taxation. There will be no expense connected with the issue except the printing of the bonds, as the Supervisors and Treasurer are required to do everything necessary under the law without fee or charge.

The Prescott Journal says that Governor or Zulick and Secretary Bayard appeared before the late Grand Jury at Prescott and asked to have the editor of that paper indicted for libel. It is needless to state that the Grand Jury refused to find any indictment. We are informed that it is part of the same scheme to try and have every Republican editor indicted in his own county, but of course it will not succeed. In the mean time the Republican press of the Territory pursue the even tenor of their way in exposing the hypocrisy of his excellency (?)

The great moral vetoist, the Governor of Arizona, who vetoed the lottery bill with such great flourish and proclaimed himself abroad, with a flourish of trumpets, the great moralist, by vetoing a bill he himself recommended shows to all discerning minds the abominable hypocrisy in the stuff he is made of by the fact that at the moment he vetoed the lottery bill he signed a bill making faro, stud horse poker, bean poker and all sorts of tin horn gambling lawful in the Territory. While he preaches about the "mother gathering her children about her knee to educate them" and closing our public schools rather than to have them supported in any part by such means as he pretends to veto, he at the same time is writing his approval of a bill that does support those schools from proceeds derived from gambling even of the very lowest kind, and opens wide the door to the moral and intellectual destruction of the youth of Arizona, the dice box, the faro game, the poker game and every sort of gambling game under the sun. Oh, you most consummate hypocrite! —Phoenix Herald.

The Verdlet Unanimous.

W. D. Selt, Druggist, Hippo, Ind., testifies: "I can recommend Electric Bitters as the very best remedy. Every bottle has given relief in every case. One man took six bottles, and was cured of Rheumatism of 10 years standing." Abraham Hare, Druggist, Belleville, Ohio, affirms: "The best selling medicine I have ever handled is my 20 years experience, is Electric Bitters." Thousands of others have added their testimony, so that the verdict is unanimous that Electric Bitters do cure all diseases of the Liver, Kidneys or Blood. Only a half dollar a bottle, at Watkins Bros' Drug House.

Specifications for the Proposed Court House and Jail Building at Kingman, County of Mohave, Arizona.

Size—Building to be 42 feet 8 in. by 74 in. outside measure. First story to be 14 feet, second story to be 16 feet.

Foundation—To be of stone, laid in good lime mortar, not less than sixteen inches wide and four feet high in front.

SILLS—To be 2x12, well bedded on wall of foundation.

JOIST—First floor to be of 2x8, and supported through the center with two good 6x8 stringers and supported with good stone piers located under hall partitions, about six feet from center to center, and all floor joists not more than 16 inches from center to center, and to have two rows of bridging made of 1x2, well nailed, on each side of the hallway. Second floor joists to be 2x12. Ceiling joists to be of 2x6, and not more than 16 inches from center to center.

STUDDING—Outside wall studding to be of 2x6 running from sills to plate and not more than two feet from center to center. Partition studding all to be of 2x6 and not more than 16 inches from center to center, and braced. Under all partitions running crossways of the building there are to be double joists.

FLOORS—All floors to be of good matched 6 inch flooring of Oregon pine 1 1/2 inch thick.

OUTSIDE WALLS—Outside walls to be sided with good 1/2 inch siding, laid not more than 4 1/2 inches to the weather. Inside of wall to be boarded with 1 inch surfaced boards nailed on diagonally.

ROOF—Rafters to be 2x6, not more than 16 in. from center to center, well trussed so as to make it self supporting, and covered with inch boards and redwood shingles laid not more than 4 1/2 inches to the weather. Roof to have not less than two feet projection.

CORNICE—All cornice to be made of frieze, plinthe, fascia, and crown mould as per detail.

PLASTERING—All walls and ceilings to be plastered; walls to be wainscoted throughout 4 feet. Plastering to be done in a good and workmanlike manner and hard finished with good lime and plaster of Paris.

STAIRS—Main stairs to be of two inch Oregon pine with three 9 inch newell posts and 5 inch black walnut rail with 2 inch balusters to each step. Stairway to be 6 feet wide with 13 inch tread and not more than 7 1/2 rise.

DOORS—Front doors to be 2 feet 10 in. by 8 feet as per plan. All other doors to be 2-10x10, 1 1/2 inch thick, with transoms over each door, 24 inches high. All the doors and windows to be located as per plan.

WINDOWS—Front windows to be double each window of two lights 2ft.x4ft. All other windows to be four lights, each light to be 15x48. All windows to be located as per plan and hung with weights and pulleys. Small window in jailer's room as per plan. All outside finish to be 1 1/2 inch thick, except cornice. All inside finish to be put on after plastering. All casings to be 1x6. All openings to be finished as per plan and details.

FRONT—To be made as per plan and details.

VAULTS—To be in Recorder's office, as per plan, to be built of adobe, of double walls with air chamber between. Outside walls to be 12 inches thick—air chamber 2 inches wide, the inside walls 6 inches—the two walls to be tied every fifth brick on every seventh course. Foundation of vault to be of stone laid in mortar level with floor of house, inside of stone walls to be of concrete. Vault to be 8 1/2 feet in center with arched roof. Outside of vault finished up to correspond with rest of the room.

ROOF—To be of pitch as indicated in plan.

HARDWARE—All doors to be fitted with mortised locks and bronze fittings. Windows fitted with brass finger lifts of suitable size.

WAINSCOTING—To be of California red wood 1x6 T and G headed, to be oiled with boiled linseed oil and varnished with best quality of white varnish.

PAINTING—First coat to be of linseed oil and white lead, 8 pounds to the gallon. Second coat to be of linseed oil and white lead, 16 pounds to the gallon. Color to be of light slate. Trimmings dark of same shade.

PLATFORM OR PORCH—To be in front of front door 10 feet wide and 20 feet long with row of steps on each end and center. Steps to be of same width and material as stairway steps and painted with three coats of paint.

OPENINGS—All to have headers above and below.

HALLWAY UPSTAIRS—To be furnished with trap door in ceiling and stationary ladder connected therewith.

COURT ROOM—To be furnished with platform for judge and clerk, and two jury boxes as per plan, and set on main floor. Court room to be provided with railing, balusters and base of redwood, oiled and varnished, as shown in plan, with one opening and two newel posts.

FRONT STONE WALL PROJECT UNDER COLUMNS AT BASE 10 INCHES.

DOORS LEADING FROM HALL TO COURT ROOM TO BE DOUBLE AND HUNG ON HEAVY HINGES SWINGING EITHER WAY.

LOCK FOR FRONT DOOR OF BUILDING TO BE OF BRONZE—the usual mortised heavy front door lock with catch, fittings and handle.

JAIL BUILDING.

Size of building 18x28; height 12 feet to ceiling; roof to be 1/2 pitch, shingled 4 1/2 inches to the weather.

Sides and ceiling to be 1x12 boards, double, and covered on outside with beveled siding—sides to be secured nailed with wrought nails and clinched, not more than three inches apart.

Foundation to be a stone wall one foot square, laid all round the building, stone to be laid in cement—the inside to be laid up level to the walls with concrete made of gravel and hydraulic cement.

Foundation for jail cells, three in number, to be 10x13—outside sills to be of 4x4, inside sills 2x4.

Sills of main building to be 4x4; rafters 2x6; plates and collar beams 2x4; sheathing 1x6.

To be two windows on west side and two on north end and one on east side—each 3 ft 2 in. by 2 ft 10 in., single 6 light sash, hung so as to swing out and fasten outside of building—and furnished with double iron gratings and casings.

Small sliding ventilator in ceiling and one grated ventilator in back of building.

Door from jail building to jail yard to be of double inch boards nailed and clinched and furnished with heavy iron hinges and hasp and staple and good tumbler jail lock, and transom with double iron grating.

Windows to be fitted with suitable hinges and catches.

Building and roof to be painted inside and out with two coats of paint.

Chimney to be of terra cotta cemented and set in center of building extending down to within about 2 1/2 feet from top of cells and out of roof one length, or more, and provided with ornamental top piece.

Main sewer pipe to be laid under the concrete from vault to outside wall extending outside of building 2 feet and provided with coupling for future attachments and pipe to fit the vault now in jail.

For further information apply to the Clerk of the Board of Supervisors.

DEATH IN THE WATER.

IS THE ELEMENT WE DRINK DECIMATING THE PEOPLE?

How a Universal Menace to Health May Be Destroyed.

A few years ago the people in a certain section in one of the leading cities of the State were prostrated with a malignant disease, and upon investigation it was found that only those who used water from a famous old well were the victims.

Professor S. A. Lattimore, an expert of the New York State Board of Health, upon analyzing water from this well, found it more deadly than the city sewage!

The filling up of the old well stopped the ravages of the disease.

Not long since the writer noticed while some men were making an excavation for a large building, a stratum of dark colored earth running from near the surface to hard pan. There it took an other course toward a well near at hand.

The water from this well had for years been tainted with the drainings from a receiving vault, the perforations of which had discovered the earth!

Terrible!

A similar condition of things exists in every village and city where well water is used, and though the filtering which the fluids receive in passing through the earth may give them a clear appearance, yet the poison and disease remains, though the water may look never so clear.

It is still worse with the farmer, for the drainage from the barn-yard and the slops from the kitchen eventually find their way into the family well!

The same condition of things exists in our large cities, whose water supplies are rivers fed by little streams that carry off the filth and drainage from houses. This "water" is eventually drunk by rich and poor alike with great evil.

Some cautious people resort to the filter for purifying this water, but even the filter does not remove this poison, for water of the most deadly character may pass through this filter and become clear, yet the poison disguised is there.

They who use filters know that they must be renewed at regular periods, for even though they do not take out all the impurity, they soon become foul.

Now in like manner the human kidneys act as a filter for the blood, and if they are filled up with impurities and become foul, like the filter, all the blood in the system coursing through them becomes bad, for it is now a conceded fact that the kidneys are the chief means whereby the blood is purified. These organs are filled with thousands of hair-like tubes which drain the impurities from the blood, as the sewer pipes drain impurities from our houses.

If a sewer pipe breaks under the house, the sewage escapes into the earth and fills the house with poisonous gas; so if any of the thousands and one little hair-like sewer tubes of the kidneys break down, the entire body is affected by this awful poison.

It is a scientific fact that the kidneys have few nerves of sensation; and, consequently, disease may exist in these organs for a long time and not be suspected by the individual. It is impossible to filter the blood of the death out of the blood when the least derangement exists in these organs, and if the blood is not filtered then the uric acid, or kidney poison, removable only by Warner's safe cure, accumulates in the system and attacks any organ, producing nine out of ten ailments, just as sewer gas and bad drainage produce so many ills in the house.

Kidney disease may be known to exist if there is any marked departure from ordinary health without apparent known cause, and it should be understood by all that the greatest peril exists, and is intensified, if there is the least neglect to treat it promptly with that great specific, Warner's safe cure, a remedy that has ascertained the highest recognition by scientific men who have thoroughly investigated the character of kidney derangements.

They may not tell us that the cause of so many diseases in this organ is the impure water or any other thing, but this poisonous water with its impurities coming constantly through the delicate organs undoubtedly does produce much of the decay and disease which eventually terminate in the fatal Bright's disease, for this disease, alike among the drinking men, prohibitionists, the tobacco slave, the laborer, the merchant and the tramp, works terrible devastation every year.

It is well known that the liver which is so easily thrown "out of gear" as they say, very readily disturbs the action of the kidneys. That organ when deranged, immediately announces the fact by salivary skin, constipation, bowels, coated tongue and headache, but the kidneys, when diseased, struggle for a long time, and the fact of its disease can only be discovered by the aid of the microscope or by the physician who is skillful enough to trace the most indirect effects in the system to the derangement of these organs, as the prime cause.

The public is learning much on this subject and when it comes to understand that the kidneys are the real health regulators, as they are the real blood purifiers of the system, they will escape an infinite amount of unnecessary suffering, and a length of days and happiness to their lot.

Our Wealthy Men.

Much has been said in newspapers of men who have made large fortunes in comparatively a few years in various business industries. Many of these articles are written by correspondents of prominent newspapers and copied into others of lesser note. Correspondents generally are sel-

dom men of business qualifications and wrongfully picture these men and their business as a thing of accident; this is not the case with those we have met.

We find that where men have made large fortunes by their own business talent and industry they chose with sagacity and forethought such business as would lead to success when handled with business judgment. No man has been before the public as an example of success, both in wealth and the magnitude of his business (outside of stock and railroad men) more prominently than Dr. G. G. Green, of Woodbury, N. J. He is at the head of many large industries and, yet comparatively a young man. When the fact that August Flower for dyspepsia and liver complaint and Boesche's German Syrup, for coughs and lung troubles, has grown to a wonderful sale in all parts of the world, it proves that it was not an accident or spontaneous strike at wealth. His medicines are recognized as valuable and established remedies and the business has grown gradually and permanently during the last eighteen years on account, not alone of Dr. Green's abilities as a business man or his "good luck," but on the actual merits of the two preparations.

—Copied from the N. Y. Weekly Sun of Dec. 22, 1886.

A Suggestion to the Traveling Public.

Tourists, emigrants and mariners find that Hostetter's Stomach Bitters is a medicinal safeguard against unwholesome influences, upon which they can implicitly rely, since it prevents the effects of vitiated atmosphere, unaccustomed or unwholesome diet, bad water, or other conditions unfavorable to health. On long voyages, or journeys in latitudes adjacent to the equator, it is especially useful as a preventive of the febrile complaints and disorders of the stomach, liver and bowels, which are apt to attack natives of the temperate zone on journeying or traveling in such regions, and it is an excellent protection against the influence of extreme cold, sudden changes of temperature, exposure to damp or extreme fatigue. It not only prevents intermittent and remittent fever, and other diseases of a malarial type, but eradicates them, a fact which has been notorious for years past in North and South America, Mexico, the West Indies, Australia and other countries.

Proposals for the Erection of a Court House and Jail Building for the County of Mohave.

Scaled proposals for the erection of a Court House and Jail building in accordance with the plans and details adopted by the Board of Supervisors, now on file in the office of the clerk, and the specifications published below, will be received by the Board of Supervisors of the county of Mohave, at the office of the Board in the building now used as the Court House in the town of Kingman, on Saturday the 14th day of May, 1887, at 2 o'clock p. m., at which time and place they will be opened in the presence of bidders.

Bidders will be required to furnish all lumber, nails, lime, labor and material of every kind or nature necessary in the construction of said Court House and Jail and to furnish a good and substantial bond for the faithful performance of the contract, to be approved by the Board, in a sum not less than the amount of the bid, and more if required by the Board.

They will also be required to complete the work as follows:

The Jail foundation in readiness for the reception of the iron cells on or before June 4th, 1887.

The Jail building in readiness for occupancy on or before June 18th, 1887.

The Court House building to be completed, in readiness for occupancy, on or before July 31st, 1887.

Bidders must state the lowest cash price at which said work will be done, and payment will be made in lawful money of the United States as follows:

One-fifth of the amount when the Jail building is completed and accepted by the Board, one-fifth when the main building is covered, one-fifth when the plastering is finished, one-fifth when the contractor turns over the Court House to the Board, or its representative, and one-fifth upon the final acceptance of the building by the Board of Supervisors.

No bids will be received upon any condition whatever after the time specified, nor will any be entertained which do not conform to the requirements of this advertisement.

The Board reserves the right to reject any and all bids.

Bids must be in the form of sealed proposals, addressed to or deposited with the Clerk of the Board and plainly marked "Proposals for building Court House and Jail."

By order of the Board.

JAMES J. HYDE, Clerk.

Kingman, April 18th, 1887.

Notice of Order Appointing Time and Place for Hearing Application to Sell Personal Property.

In the Probate Court of the County of Mohave, Territory of Arizona.

In the matter of the Estate of William M. Erider, deceased.

Notice is hereby given that Edmund Burke, Administrator of said Estate, having filed in this Court his petition for an order of sale for a portion of the personal property of said Estate, and certain interest in mining claims, the hearing of which petition has been fixed by said Court for Saturday the sixteenth day of April 1887, at eleven o'clock a. m., of said day, at the Court Room at Taggart's Building, in the town of Kingman in the County of Mohave, and all persons interested in said estate are notified then and there to appear and show cause, if any there be, why the said petition should not be granted or order made.

Dated April 6th, 1887.

Wm. G. BLARELY, Clerk.

J. M. Murphy Attorney for Plaintiff.

Sinking Fund Notice.

Office of the Treasurer of Mohave County, Arizona, Kingman, April 6th, 1887.

Bids for the surrender of Mohave county warrants will be received by me at my office until 2 o'clock, p. m., on Monday, April 25th 1887.

Amount in the Sinking Fund to be bid for is six hundred and eight dollars (\$608).

Bids must be in the form of sealed proposals accompanied by the warrants offered to be surrendered, addressed to the County Treasurer and marked "Sinking Fund."

DANIEL SMITH, County Treasurer.

Excitement in Texas.

Great excitement has been caused in the vicinity of Paris, Tex., by the remarkable recovery of Mr. J. E. Corley, who was so helpless that he could not turn in bed or raise his head; everybody said he was dying of Consumption. A trial bottle of Dr. King's New Discovery was sent him. Finding relief, he bought a large bottle and a box of Dr. King's New Life Pills; by the time he had taken two boxes of pills and two bottles of the Discovery, he was well and had gained in flesh thirty-six pounds.

Trial Bottles of this Great Discovery for Consumption free at Watkins Bros., Large Bottle \$1.00.
